Ok. Olga Bautista with the Coalition to Ban Petcoke on the Southeast Side has reached

out to us desperate for more information. So I would ask her and see if there was anyone else that should be included.

At the end of the month, would you (or someone from EPA) be willing to sit down with the community leaders and walk through the data and what it means?

Hi Kady:

Here's the filter based monitoring for March. April not due til the end of this month. This does not include the FRM monitoring results, which are up on website.

If you want to understand the difference between those two, let me know.
